MIL-STD 810

Rock Solid Basics:

ALE (Automatic Link Establishment)

The built-in ALE system automatically selects the best channel and establishes a communication link. ALE provides interoperability with other 2G ALE radios using MIL-STD-188-141B and FED-STD-1045A ALE standards. ALE individual call, net call, sounding, AMD (Automatic Message Display) and LQA (Link Quality Analysis) polling are available.

Selcall (Selective Calling)

The IC-F8101 provides CCIR493-4 based 4-digit and 6-digit open standards Selcall, widely used in HF networks and HF calling systems. Supported Selcall functions include: selective calling, phone call, message call, position call, status call, emergency call and channel test call. For security, the owner password-enabled stun feature can remotely disable the radio operation and the radio can be GPS tracked.

Compact and Durable

The IC-F8101 has a durable, enclosed structure securely sealed from the elements, in a stealthy black compact package. The IC-F8101

IC-F8101 with optional MB-126.

and the CFU-F8100 cooling fan unit has been tested to MIL-STD-810-G and IP54 ratings. Also, connection cables and connectors are IP54 water resistant.

125W* of Powerful RF Output

With the fanless design, you get 125W* output with full duty cycle operation in voice mode or in data mode a maximum 5 minutes of continuous transmission (25% duty cycle). When used with the CFU-F8100 optional external cooling fan unit, the IC-F8101 provides full duty cycle data and voice mode operations for absolute reliability during long continuous transmit cycles, or for operation in hot climates.

* 100W for Australia versions.

Optional CFU-F8100 fitted to the rear panel.

Optional CFU-F8100.

BITE (Built-in Test Equipment) Function

You can check the transceiver's internal condition by using the BITE capability. Auto, logic, receiver, and transmitter are checked.

IC-F8101

A Benchmark for Ease and Convenience: _____

User Friendly Operation

The IC-F8101 is designed for simple, straightforward operation. The Administrator/User feature can limit the functions that are accessed by the User. The Administrator can enter the operating frequency and assign memory channels from the front panel or the remote control microphone.

The following functions can be assigned to the [I], [II], and [III] soft key buttons: Main menu, Manager menu, Set mode, Selcall address list, RX history, and TX history.

Function button menus are shown at the bottom of the display

Clear Talk Noise Reduction

The clear talk feature separates signals from noise using the DSP and gives you clearer audio at the touch of a button.

Mute Functions

The IC-F8101 has 3 types of mute functions: call squelch, S-meter squelch and syllabic voice squelch. Call squelch opens the squelch only when receiving a Selcall or ALE call sent intentionally to this station and provides quiet standby.

Digital Signal Processor (DSP)

The latest DSP technology improves both the transmitter and receiver performance. The digital IF filter provides flexible filter settings for narrowband signals.

Various Accessories: _____

GPS Receiver Connection

When connected to the UX-248 optional GPS unit, the IC-F8101 can send current position data to other stations and can be used with a AVL (Automatic Vehicle Location) system.

Optional UX-248

USB Port for PC Connection

The IC-F8101 can be connected to a PC through a USB port for HF e-mail, CI-V remote control and modulation input.

Rear Panel View

Data Communications

The IC-F8101 has an internal expansion slot for an optional RapidM TC4 HF Data Modem Module*. This provides HF e-mail capability when a PC is attached.

* A third party product.

Many More Features: _____

- Multiple operating modes (SSB, AM, CW and Data mode)* (* SSB and AM (RX only) for Australia versions)
- 500kHz to 29.999MHz general coverage receiver (TX: 1.6MHz to 29.999MHz) and VFO mode operation
- 500 Selcall, 500 ALE address memories
- ±0.3ppm frequency stability (-30°C to +60°C)
- PTT tune function automatically starts tuning when the PTT button is pushed.

- RFDS (Royal Flying Doctor Service) emergency calls* (* Australia version only)
- TX Power protection (PA unit high temperature, high SWR, low battery)
- Display mode: SWR, voltage, clock, GPS position, direction and elevation
- FCC part 90 compliant (USA version)

Automatic Tuning Antennas

AH-760

Wide frequency type

AH-740

Compact type

Two types of high performance, automatic high-speed tuning antennas are available.

AH-760, Heavy-duty Moving Coil Antenna

- 200W PEP SSB, 125W PEP CW/DATA
- 1.6MHz–29.999MHz wide frequency coverage with the supplied whip antenna
- 350mS high speed tuning (while memory tuning)
- Tested to IP68 and MIL-STD-810G environmental standards

AH-740, Relay-Driven Compact Antenna

- Relay-driven compact automatic tuning antenna
- Compact and lightweight (3.5kg)
- 150mS typical high speed tuning (while memory tuning)
- Low power consumption (0.4A typical)

AH-5NV NVIS (Near Vertical Incidence Skywave) kit

- Fiberglass antenna element (4.5m; 14.8ft) for short range communication within approximately 500km* (* Depending on radio propagation conditions)

Three types of controller configurations

Three types of controller configurations are available to suit almost any application or installation that may be required.

Controller attached type

Ideal for standard desktop use or quick set-up at a field station.

Remote control microphone type*

Phone-style convenience for mobile operation in all types of modern vehicles.

Detached controller type*

Get the proven ergonomics of a compact head and hand microphone with the separated RF unit.

* For the detached controller and remote control microphone types, an optional separation cable is required. (Purchase separately)
